### **DETAILED ACTION**

Claims 4-7 are pending in the application.

#### ***Priority***

1. Any non-provisional application claiming the benefit of one or more prior filed copending nonprovisional applications or international applications designating the United States of America must contain or be amended to contain in the first sentence of the specification following the title a reference to each such prior application, identifying it by application number (consisting of the series code and serial number) or international application number and international filing date and indicating the relationship of the applications. Cross-references to other related applications may be made when appropriate.

"This application is a national stage entry under 35 U.S.C. § 371 of PCT/US03/32746, filed November 10, 2003 which claims benefit of Provisional Application No. 60/428,892, filed November 22, 2002." is suggested.

#### ***Specification***

2. The incorporation of essential material in the specification by reference to an unpublished U.S. application, foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference, if the material is relied upon to overcome any objection, rejection, or other requirement imposed by the Office. The amendment must be accompanied by a statement executed by the applicant, or a practitioner representing the applicant, stating that the material being inserted is the material previously

incorporated by reference and that the amendment contains no new matter. 37 CFR 1.57(f).

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

4. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following reason(s) apply:

- a) Claim 5 is vague and indefinite in that it is not known what is meant by the periods which appear after the letters a, b, c and d and after the 1<sup>st</sup>, 2<sup>nd</sup>, and 3<sup>rd</sup> species which indicates the end of the claim which is not so.
- b) Claim 5 is vague and indefinite in that it is not known what is meant by "[1,5a]" in the second species.
- c) Claim 5 is vague and indefinite in that it is not stated in the proper form of a Markush grouping. An "and" after the 3<sup>rd</sup> species is suggested.

### ***Allowable Subject Matter***

5. Claims 4, 6 and 7 are allowed. None of the prior art of record or a search in the pertinent art area teaches the compounds, compositions and method of use of the compounds of formula III as claimed herein.
